MISSION

II Promoting enhanced human security in countries affected by landmines/ Explosive Remnants of War (ERW) and other impacts from conflict. II

The mission of ITF is to enhance safety as well as to enable the recovery and development of conflict affected countries by addressing the immediate and long-term impact of mine/ERW and other hazards following armed violence. A human security approach is applied to all of the ITF interventions as it provides a dynamic and practical policy framework for addressing widespread and cross-cutting threats. This human security approach upholds the linkages between humanitarian mine action and surplus arms reduction, as well as the nexus between security and development. It also supports the development of essential preconditions, capabilities and capacities that pave the way to comprehensive development, and facilitate full national ownership and accountability in conflict affected countries.

STRATEGIC PILLARS

Humanitarian mine action and reduction of other at-risk weapons and ammunition are about human security and restoring to human dignity. These two disciplines should not be limited to immediate relief, but should also address reconstruction and development. They both pave the way to peace and stability, make conflict affected communities safer, and set the stage for post-conflict recovery and development. However, long-term impacts of mines/ERW and other explosive hazards on people and communities remain even after they are removed. Therefore, ITF identifies two main pillars of its work, which will better support the efforts in building community resilience, addressing immediate and long-term impact of mine/ERW, arms and ammunition in conflict affected communities.

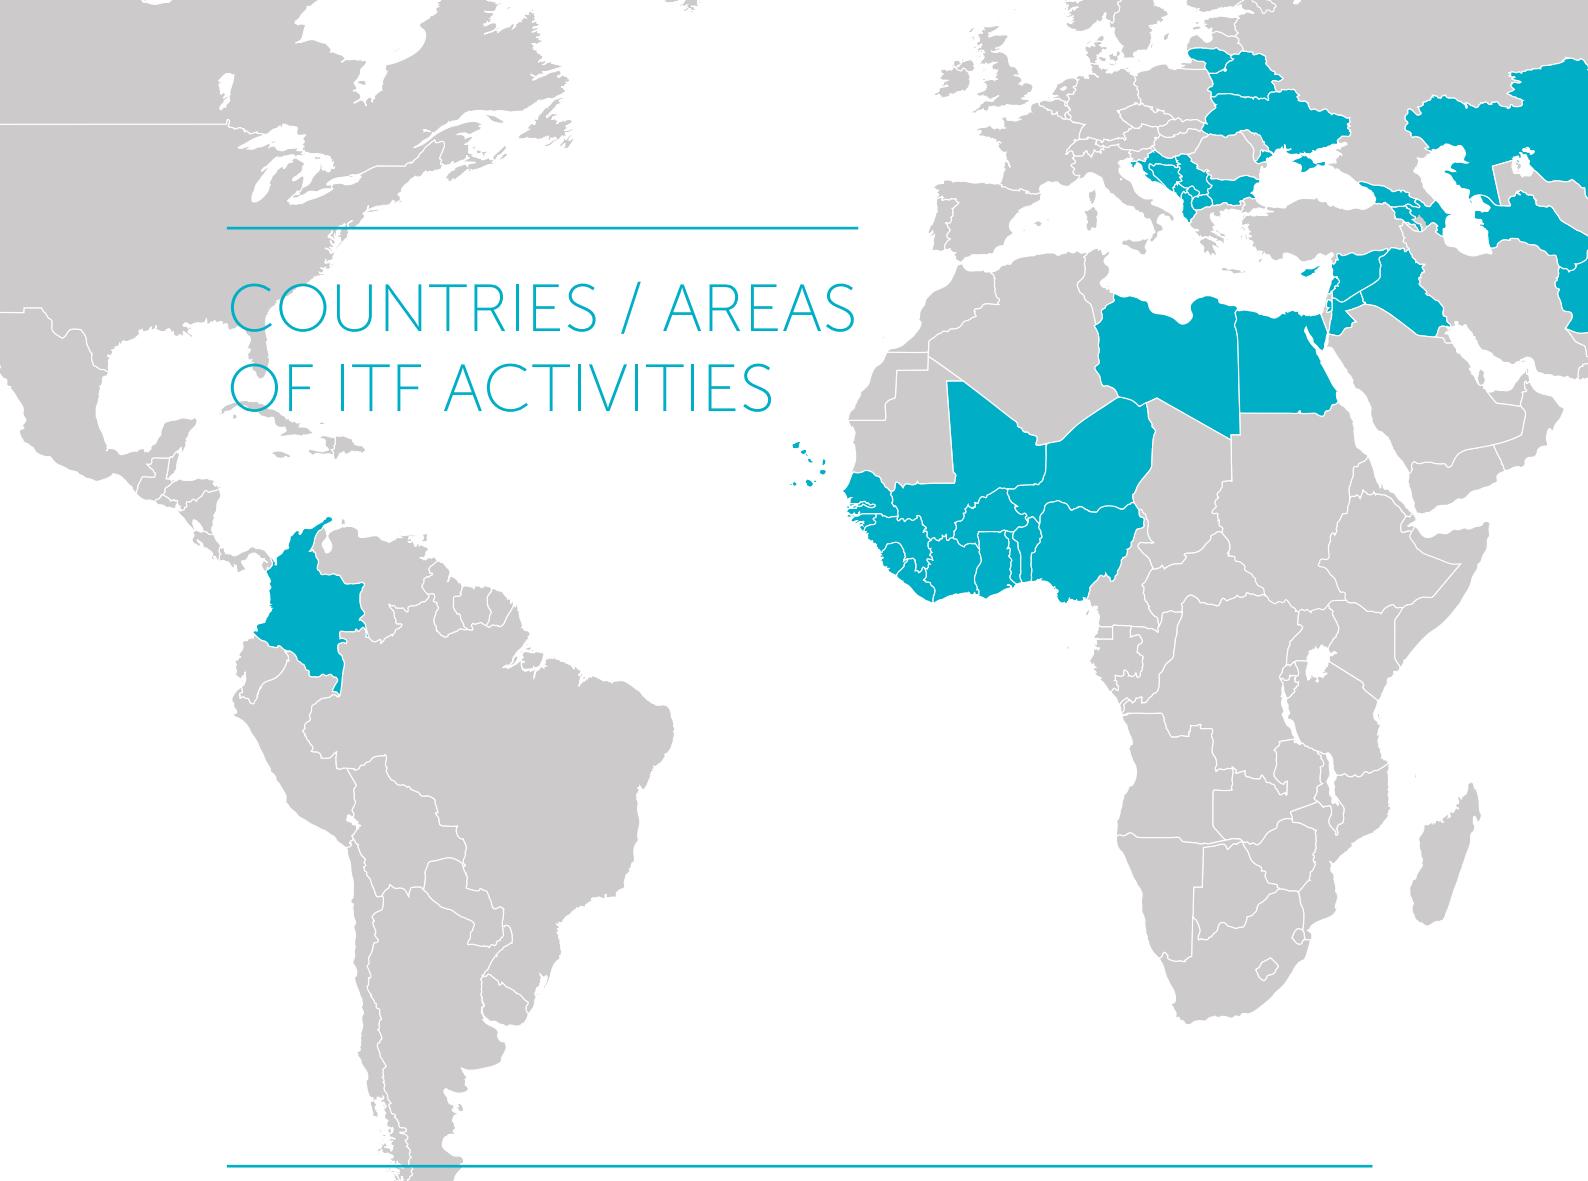

STRATEGIC PILLAR I

Reducing threats from mines, explosive remnants of war and other at-risk weapons and ammunition.

STRATEGIC PILLAR II

Facilitating safe, long-term development and building resilience of conflict-affected communities.

COUNTRIES / AREAS OF ITF ACTIVITIES

SOUTH EAST EUROPE:

Albania
Bosnia and Herzegovina
Croatia
Macedonia
Serbia
Kosovo*
Montenegro
Bulgaria

BALTIC STATES:

Lithuania

SOUTH CAUCASUS:

Armenia
Azerbaijan
Georgia
CENTRAL ASIA:
Tajikistan
Afghanistan
Kyrgyz Republic
Turkmenistan
Kazakhstan
Mongolia

MIDDLE EAST:

Gaza Strip
Jordan
Lebanon
Syria
Egypt
Iraq
West Bank

AFRICA:

Cabo Verde
Economic Community of West African States
Libya

OTHER REGIONS:

Belarus
Cyprus
Colombia
Ukraine

* This designation is without prejudice to positions on status, and is in line with UNSCR 1244 and the ICJ opinion on the Kosovo declaration of independence.

FUNDRAISING

A total of 411,631,065.27 USD of donations was entrusted to ITF for managing over 3,100 programs and projects;

32 countries, the European Union, the UN Development Program, the UN Mine Action Service, OPEC Fund for International Development, the Council of Europe Development Bank, over 10 local authorities in mine affected countries, 130 international and local public and private companies, non-governmental organizations and individuals have donated funds through ITF;

Low administrative costs;

ITF Donor Countries: Austria; Azerbaijan; Belgium; Bosnia and Herzegovina; Canada; Croatia; Cyprus; Czech Republic; Denmark; France; Germany; Hungary; Ireland; Japan; Korea; Kuwait; Libya; Liechtenstein; Luxembourg; Monaco; Norway; Qatar; Slovak Republic; Slovenia; Spain; Sweden; Switzerland; Serbia; Turkey; the Netherlands; United Kingdom/DFID; United States of America.

OVERVIEW OF ITF ACTIVITIES BY STRATEGIC PILLARS

STRATEGIC PILLAR I

*Reducing threats from mines,
explosive remnants of war
and other at-risk weapons and
ammunition.*

MINE AND UXO CLEARANCE

- Over **139 million** square meters of mine and UXO contaminated land has been cleared.
- **Two countries in the region of South East Europe have already achieved mine impact free status – Macedonia (2006) and Albania (2009).**

ALBANIA
2,618,065

BOSNIA AND HERCEGOVINA
77,315,656

CROATIA
32,166,016

MACEDONIA
4,453,707

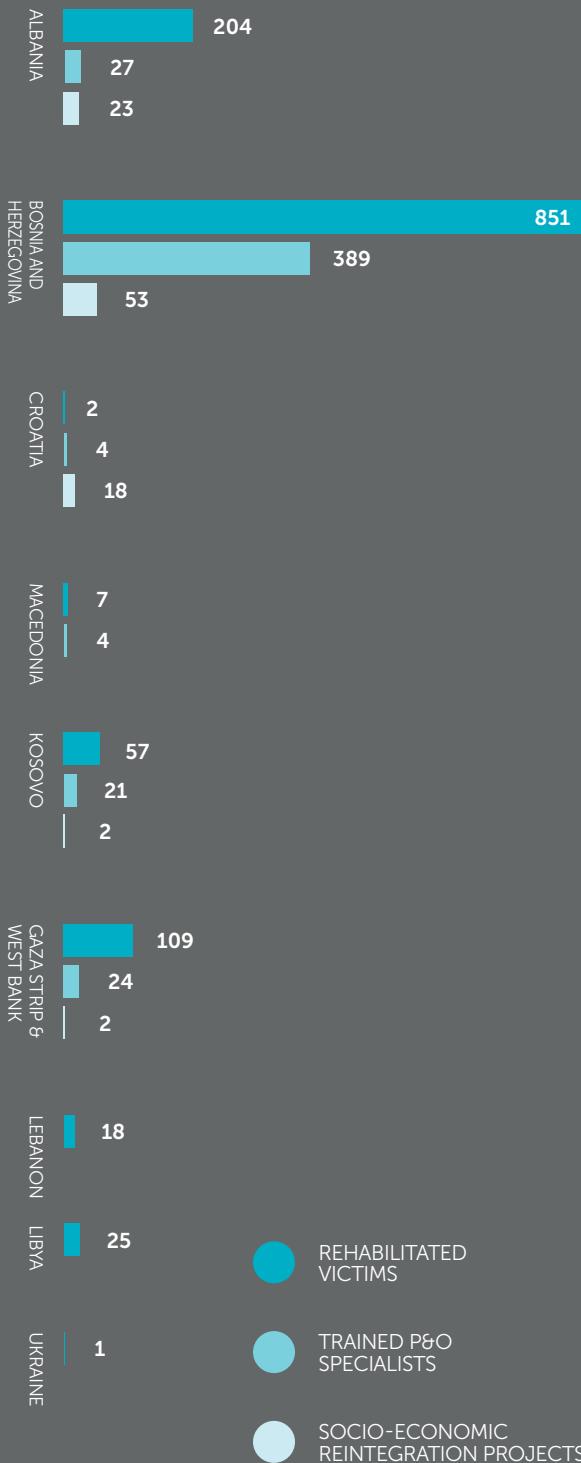

MONTENEGRO
721,125

SERBIA
12,578,570

KOSOVO*
6,037,825

AZERBAIJAN
2,100,000

LEBANON
1,298,715

MINE/UXO VICTIM ASSISTANCE AND RISK EDUCATION

- **1,277** mine survivors received rehabilitation treatment at the University Rehabilitation Institute Republic of Slovenia (URI Soča) and Rehabilitation Centres in Bosnia and Herzegovina/Lebanon.
- Over **54,000** people in mine affected countries in South East Europe directly received mine disability awareness messages on annual basis.
- Over **17,000** mine survivors and other disabled persons received psycho-social help through sports, peer support and other activities.
- Over **1,400** children mine survivors attended summer and winter rehabilitation camps.
- Over **880** mine survivors that were engaged in socio-economic programs received either economic assets, loans or scholarships.
- Around **440,000** school children and adults in mine contaminated areas received mine risk education (MRE) directly.
- Around **610,000** family members in these communities received MRE indirectly.
- 8 educational films for children and 4 MRE Public Education Campaigns have spread mine risk education and awareness messages throughout endangered communities.

CAPACITY BUILDING/TRAINING/REGIONAL COOPERATION

- Over **1,100** experts received training in the field of humanitarian demining, victim assistance, stockpile destruction and/or mine action management.
- ITF supported the work of Mine Action Centers in South East Europe (in Albania, Bosnia and Herzegovina, Croatia, Kosovo, Macedonia, Montenegro and Serbia) and in South Caucasus (in Georgia).
- Support of regional Mine Detection Dog Center in Konjic, Bosnia and Herzegovina.
- Support of Regional Center for Underwater Demining in Bijela, Montenegro.
- Deployment of the Decision Support System for Mine Suspected Area Reduction in Bosnia and Herzegovina and Croatia.
- On-going project »Capacity Support of Libyan Center for Mine Action and Remnants of War in Securing and Eliminating Conventional Weapons in **Libya**«.
- On-going projects »Capacity Support to Mine Action Coordination in **Afghanistan**« and »Quality Assurance and Quality Control of Firing Ranges in **Afghanistan**«.
- Support and coordination of the **South East Europe Mine Action Coordination Council**.
- ITF participates as a member of a Steering Committee at the meetings of US Department of State initiative **“Regional Approach to Stockpile Reduction”** – RASR.

CONVENTIONAL WEAPONS DESTRUCTION (CWD)

- On-going CWD projects in Croatia.
- On-going destruction of obsolete ammunition and renovation of storage facilities in Kyrgyz Republic.
- On-going UXO hotspots clearance in Berat, Albania.
- On-going PSSM facility upgrade in Croatia.
- Completed UXO clearance project after ammunition depot explosion in Gerdec, Albania.
- Over one million people within Albania received small arms/light weapons (SA/LW) risk education.
- Capacity building of local Albanian NGOs to deliver SA/LW risk education programs.
- Completed Physical Security and Stockpile Management (PSSM) Training in South East Europe.
- Completed UXO clearance project after ammunition depot explosion in Chelopechene, Bulgaria.
- Completed CWD projects in Bosnia and Herzegovina, Montenegro and Lithuania.

STRATEGIC PILLAR II

Facilitating safe, long-term development and building resilience of conflict-affected communities

- 240 children affected by political violence, instability and armed conflict in Ukraine received **psychosocial rehabilitation and treatment** at the Slovenian Red Cross Health and Youth Resort on the Slovenian coast.
- 59 Belarusian children that are suffering from the consequences of radiation following the 1986 nuclear accident in Chernobyl have benefited from **medical rehabilitation** at the Slovenian Red Cross Health and Youth Resort in Slovenia.
- ITF is addressing the needs of around 400 Syrian children refugees in Shatila refugee camp in Beirut, Lebanon, by providing them with **educational and psychosocial care** and attention that will enable them to overcome the sufferings and difficulties they have experienced during times of conflict and prolonged periods of being refugees.
- **Telemedicine and e-Health Program** for Cabo Verde was established with 10 telemedicine centers that enable and medical teleconsultations/assistance to remote sites, continuous medical education, research and international cooperation virtually throughout all 9 inhabited islands of Cabo Verde and beyond. 11 Telemedicine Centers have been established with 18 doctors and other medical personnel trained.
- 5 rehabilitation specialists from Egypt have undergone **physical and medical rehabilitation (PMR) training** at URI Soča in Slovenia.
- ITF is working with the Economic Community of West African States (ECOWAS) in addressing the gaps between early warning and response by strengthening ECOWAS Early Warning and Response mechanism and enhancing capacity on regional as well as national level in West Africa. Through participation in the Early Warning and Response Partnership (EWARP) ITF supports information sharing, conflict prevention and crisis management among West African states.
